Every GM security system works on this one simple principle: The Key/Lock component sends an input signal to the TDM/BCM through the wiring. When the TDM gets the right input signal, it produces an output signal that allows the engine to start.

NEWROCKIES Inc. Passlock Bypass disables the ENTIRE system.

A lightning rod (US, AUS) or lightning conductor is a metal rod mounted on a structure and intended to protect the structure from a lightning strike. If lightning hits the structure, it will preferentially strike the rod and be conducted to ground through a wire, instead of passing through the structure, where it could start a fire or cause electrocution.

Lightning rod - Wikipedia

In physics, cryogenics is the production and behaviour of materials at very low temperatures. A person who studies elements that have been subjected to extremely cold temperatures is called a cryogenicist.. It is not well-defined at what point on the temperature scale refrigeration ends and cryogenics begins, but scientists assume a gas to be cryogenic if it can be liquefied at or below -150 ...

Angular Resolution Criteria. This diffraction artifact — the Airy disk and encircling rings — is the smallest possible physical image of a "point" light source. As a result, the diffraction artifacts created by two "incoherent" or physically unrelated light sources (such as two stars) will appear to merge on the image plane when the angular separation between them is smaller than the ...
