Vehicle: 2004, nissan, sentra, 1.8l u1001; nissan; sentra; 2004; asked Oct 20, 2016 by anonymous ... For this code you would have to check all the ground wire for excessive resistance that you have found and this includes the negative battery post. you just clean and reconnect, you can also test if the ECM has proper ground at the OBD II port ...

### Where exactly are the ground wires for the ecm that I need ...

My stereo in a 2004 Nissan Sentra has no sound. All of the buttons and controls work, but there is no sound. I would check to see if the fuse to the radio amplifier is blown. Look in your owner's manual for the location of the fuse. If the fuse is good you may have a bad amplifier. All the radio wires that go to the speakers run through that part.

hello, a while ago I had put the ground wire that goes on the back of the alternator on the chassis, and all the ground wires are connected in the right places this time, but, since I made a mistake with the ground wire from the alternator my car won't start.

### computer problem, ground wire related. - Nissan Forum ...

Nissan addressed this issue several years ago in a publically posted TSB and even explains how to do it. It was a fault that needs fixed on several years of SR20's. This is a common problem amongst the Nissan community of SR20 owners. The earlier MAF ground is located on the intake manifold

and corrodes over time within the insulator (ODB-I).
