MIT Computer Science and Artificial Intelligence Laboratory (CSAIL) is a research institute at the Massachusetts Institute of Technology formed by the 2003 merger of the Laboratory for Computer Science and the Artificial Intelligence Laboratory. Housed within the Stata Center, CSAIL is the largest on-campus laboratory as measured by research scope and membership.

Heart Sounds Quiz: this interactive quiz will test your ability to identify correctly the first and second heart sounds, extra sounds, diastolic and systolic murmurs in recordings of actual patients, using a computer animation of the carotid pulse for timing.

### **Blaufuss Multimedia - Heart Sounds and Cardiac Arrhythmias**

A computer is a machine that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.

Bojan Karlas Bojan is a PhD student at DS3LAB currently working on building a scalable automated machine learning system. His prior ML experience includes building time-series prediction models from his master thesis at DS3LAB and automated speech processing with recurrent neural networks from his internship at Logitech.

As part of the Horizon 2020 SHERPA project, I've been studying adversarial attacks against smart information systems (systems that utilize a combination of big data and machine learning). Social networks fall into this category - they're powered by recommendation algorithms (often based on machine learning techniques) that process large amounts of data in order to display relevant ...

Hardware aliasing occurs when the same logical address can access different physical memory locations. This is a problem for software on some embedded systems and more generally when hardware becomes faulty in irretrievable locations, such as on a Mars Lander.
