The other side of the coil connects to the yellow wire of the window switch. What happens with the window switch is that it will connect the yellow wire to ground when you are in the RPM window you set, the gray wire will remove the ground. Then if the system is armed and you are at WOT you will activate the nitrous and fuel solenoids.

MSD Digital Window Switch. Window switch works great! I installed it on my 2014 mustang gt with no problems. The only downside to this window switch is it's kinda big, but overall I'm very happy with it and I recommend it to anyone who wants to be extra safe while using a nitrous system in there mustang! The digital screen is a plus!
