The diodes serve to protect the listener from very loud volumes, in the event of accidental connection to a large voltage source. Review question: the purpose of the transformer is to increase the effective impedance of the headphones, from 8 W to a much larger value. Calculate this larger value, given a transformer turns ratio of 22:1.

Notes: This is a difficult concept for some students to master. Make sure they all understand the nature of electrical current and the importance of continuity throughout the entire circuit. Perhaps the best way for students to master this concept is to actually build working battery-switch-lamp circuits.

9.SHOP PRACTICES. Knowing about good electronic shop practices begins with introduction to the basic tools and test instruments used in electronic repair, production and troubleshooting. It continues with "hands-on" activity directed towards learning practical skills such as soldering and de-soldering and making connecting leads and cables.
