The TI-89 and the TI-89 Titanium are graphing calculators developed by Texas Instruments (TI). They are differentiated from most other TI graphing calculators by their computer algebra system, which allows symbolic manipulation of algebraic expressions—equations can be solved in terms of variables, whereas the TI-83/84 series can only give a numeric result.

Pentium 4 - Generation 7 or complete stupidity?. I had been studying Intel's publicly available white papers on the Pentium 4 for the good part of 6 months prior to its release. While the new architecture looked promising on paper, the actual implementation of the Pentium 4 is a castrated version of the ideal chip that Intel set out to design.
