The following list shows the tube types I have entered in my database, with exception of the service types (e.g. VT100, CV124). You can use the search to find service types or go to the service type lists that you can access from the page More Tube Related Stuff.; Some tube types end with an underscore (_) followed by some letters indicating the Brand or a number if the Brand is unknown.

This syntax is the standard RTF syntax; any RTF reader must be able to correctly interpret RTF written to this syntax. It is worth mentioning again that RTF readers do not have to use all control words, but they must be able to harmlessly ignore unknown (or unused) control words, and they must correctly skip over destinations marked with the * control symbol.
