Warn Authorized Parts and Service for M15000 15,000 lb. Winch

The wiring relays have 5 wires, the warn winch had a 5 pin remote. I've looked at the wiring diagram from sleeve for the relay board. I've looked at the wires coming from the remote bulkhead on the solenoid control box of the winch. Using a diagram of the warn long probe, I jumped the ground loop, and sorted out the power for winch in and winch out.

5 wire in cab winch control | IH8MUD Forum

I have an XD9000i and over labor day in moab it stopped pulling. In it's defense it's about 5 years old with LOTS of hard pulls on it, and until now has never stopped working. So when i hit the controller to spool in it just "clicks" in the housing above the drum, it'll spool out no problem, just not in :shrug: I've never opened one of those things up and frankly know nothing about electrical.

M15 12V Heavyweight Winch | WARN Industries | Go Prepared.

Mine was new so wasn't messed with. I have notes and diagrams at home I made myself to wire in a cab set up for the winch. This is the best pic I have from when I ran wires to the cab. I'm not at home til next week but if ya don't get it working by then, assuming you don't have a bad solenoid, I'll see if I can find my diagrams I wrote up.
